#### NEUE BERICHTIGTE AUSGABE

1902.

BERLIN,

VERLAG VON DIETRICH REIMER (ERNST VOHSEN A.-G.)

Das nachstehende Verzeichnis enthält die sämtlichen alten geographischen Namen, unter Beifügung der Qualität und, wo es erforderlich schien, der nichtklassischen und heutigen Namen und mit Angabe der be-treffenden Kartennummer und der durch Buchstaben am dadurch die Auffindung auf den anderen Karten von selbst gegeben ist. Die im engsten Sinne topographischen Details, welche den Inhalt der auf Taf. IX entstandenen Stadtpläne von Rom bilden, sind wegen ihrer Verschiedenartigkeit von dem geographischen Inhalte der übrigen Karten in einem besonderen, am Schlusse bei gefügten Index zu dieser Tafel zusammengestellt worden.

An dieser Stelle ist nur über diejenigen sachlichen Anordnungen, welche sich nicht von selbst verstehen,

Rechenschaft zu geben.

Die in der griechischen und römischen Literatur vorkommenden Namen sind in gewöhnlicher Schrift ge-setzt, die aus anderen als griechischen oder römischen alten Quellen aufgenommenen Namen (sanskritische, baktrische, altpersische, armenische, assyrische, syrische, hebräisch-phönikische, ägyptische, etruskische) sind durch Lapidarschrift unterschieden, Die abgekürzten Bezeichnungen der topographi-Quellen aufgenommenen Namen (sanskritische,

schen Qualität sind die allgemein verständlichen und in schen Qualitat sind die aligemein verstanditienen und in lateinischer Sprache gegeben aus Rücksicht auf die lateinische Abfassung der Nomenclatur der Karten und auf das nichtdeutsche Publikum. Unbezeichnet gelassen sind in der Regel bewohnte Ortschaften, außer wo wegen der Gleichnamigkeit mit Inseln, Bergen, Flüssen die ausdrückliche Bezeichnung als Ortschaft nötig schien, oder wo die historische Zugehörigkeit zu einer von der oder wo die historische Zugehorigkeit zu einer von der landschaftlichen Bezeichnung verschiedenen Nation bemerklich zu machen war (z. B. op. gr. = oppidum graecum). Geographische Synonyma sind entweder in Parenthese beigesetzt oder durch s. (sive) verbunden; v. hedeutet nicht vel, sondern stets vide in Verweisungen auf andere Artikel.

In den zur Bezeichnung der Lage hinzugefügten

Abkürzungen der Landesnamen ist den Gesamtnamen größerer Gebiete, wie Ariana, Graecia, Italia, Gallia u. a. der Name der speziellen Landschaft (in Parenthese) beigefügt; dagegen bedeuten zwei oder drei ohne Paren-these nebeneinander stehende Landesnamen Zugehörigkeit der betreffenden Oertlichkeit zu beiden resp. meh-reren, was sich bei Gebirgen und größeren Flüssen von selbst erklärt, bei Ortschaften durch schwankende Angaben der antiken Autoritäten, sowie durch historische Veränderungen der Grenzen bedingt wird. So be-Veränderungen der veranterungen der Grenzen beinen Ort als auf der un-entschiedenen Grenze beider großen Länder gelegen oder zu verschiedenen Zeiten dem einen oder dem anderen derselben angehörig, dagegen (Gall. Germ.) in demjenigen Teile der großen römischen Provinz Gallia gelegen, der seit Augustus den Spezialnamen Germania (cisrhenana) führte. Unmittelbar hinter dem Hauptnamen bezeichnet i. diesen als einer Insel angehörig, i, in Parenthese (insulae, Gen.) die Lage des betreffenden Ortes auf der Insel, deren Name folgt.

Alle auf die heutigen (oder überhaupt nachklassischen) Zustände bezüglichen Angaben sind in Cursiv schrift gesetzt; von topographischen Bezeichnungen ist darin nur für jetzt nicht mehr bewohnte, in Ruinen liegende Ortschaften die Abkürzung rud. (rudera) gebraucht worden, und da solche Ruinen häufig nur mittelbar durch benachbarte Orte namentlich zu bezeichnen sind, findet sich öfters dabei die Abkürzung j. (juxta) oder pr. (prope). Die häufig vorkommenden rein appellativen Benennungen solcher Reste der alten Orte in den heuti-gen Landessprachen ohne unterscheidenden Beinamen (z. B. ital. Cività, Castelvecchio, neugriech. Palaeókastron, türk. Eski Kalé, Ören- oder Viránschehr, arab. Khirbe, Kharaba u. ähnl.) sind als unerheblich weggelassen worden. Um von denjenigen lebenden Namen, welche durch vollständige oder wenig veränderte Bedeutung der ent-sprechenden alten Namen ein historisches Interesse gewähren, diejenigen zu unterscheiden, welche aus gelehrter Kenntnis mit dem bei Neugriechen, Italienern, Spaniern in unserer Zeit auflebenden, patriotischen Interesse am Altertum erst wieder neu eingeführt wurden, sind letztere in eckige Klammern [—] ein-

Die modernen Namen folgen einer landes üblichen Orthographie natürlich nur, soweit sie Sprachen anweIche sich unseres Alphabetes bedienen (also gehören, den romanischen, der deutschen, polnischen, kroatischen und magyarischen); bei der Transkription aller übrigen - also namentlich der griechischen, albanesi-Namen, — also namentlich der griechischen, albanesischen, serbisch-bulgarischen, türkischen, armenischen, persischen, indischen, arabischen - sowie der aus orientalischen Sprachen überlieferten antiken Namen, mußte mit Rücksicht auf die nichtdeutschen Leser eine allgemein verständliche Schreibart angewendet und mußten namentlich die im Deutschen für ganz andere Laute als im Englischen und Französischen gebrauchten Konsonanten ch und j vermieden und durch kh und y Ebenso ist der konsequente Gebrauch ersetzt werden. von s für den scharfen (im Deutschen durch B, fø ausgedrückten), von z für den weichen (deutsch zu Anfang der Silbe durch einfaches f bezeichneten) Zischlaut eine Akkommodation an die englisch-französische (gleichmäßig auch holländische und westslavische) Orthographie, Angewöhnung der deutsche Leser schon der jetzt allgemeinen Anwendung derselben in sprachwissenschaftlichen Werken zweckmäßig finden Dagegen konnte sch, welches dem fremden Leser keine Schwierigkeit macht, sogar von französischen Linguisten häufig angewendet wird, ebenso unbedenklich beibehalten werden, wie die zusammengesetzte Lautbezeichnung tsch (für franz. teh oder engl. ch); der entsprechende weichere Laut (im Deutschen meist mit dsch umschrieben) ist jedoch nach französischer Schreibart durch dj (= engl. j) ausgedrückt.

Eine Ausnahme von der systematischen, die wirkliche Aussprache wiedergebenden Transkription bilden nur die alttestamentlichen Namen (besonders in Taf. III), für welche die Beibehaltung der durch die gebräuchlichen Uebersetzungen gewohnheitsmäßig gewordenen, teilweise stärker von der Aussprache des Hebräischen abweichenden Formen durch die Rücksicht auf die Schule und zwar zunächst die deutsche Schule, geboten In dieser unphilologischen Umschreibung leidet war. namentlich die feinere Unterscheidung der semitischen Sibilanten, da für ', D, W, W, statt des z, s, sch unserer Transkription in der lutherischen Übersetzung einranskription in der lutnerischen Obersetzung einförmig nur s, dagegen für  $\mathfrak{T}$  (ç oder schärferes s) irrationell z (im Sinne der deutschen Aussprache = ts) gebraucht ist, so daß die Buchstaben z und s in der vulgärdeutschen und der antiken (griechisch-römischen) Schreibweise der palästinensischen Namen gerade den umgekehrten Wert haben, was bei der Vergleichung verschiedenen Namensformen zu beachten ist. Da der am meisten von dem traditionell gebrauchten s abweichende Laut des sch ( $\mathcal{C}$ ) in manchen Uebersetzungen z. B. in der englisch-kirchlichen durch (sh) unter-schieden wird. erschien es zweckmäßig, ihn in Karten Text wenigstens durch einen Akzent über und in den mit Lapidarschrift gesetzten hebräischen Namen zu bezeichnen, während in den Namen aus anderen Sprachen das volle sch beibehalten ist.

Die Vokale haben durchaus den der reinen deutschen (oder italienischen) Aussprache entsprechenden Wert, ihre Quantität ist nur in den Fällen einer möglichen Unsicherheit ausdrücklich bezeichnet: daß dies in den verschiedenen Schriftarten durch verschiedenen Schriftarten durch verschiedenen zeichen (z. B. ā und å) bewirkt ist, hat seinen Grund nur in typographischer Konvenienz. Ein von der Quantität unabhängiger Wortakzent ist in einzelnen modernen Namen gesetzt worden, die man häufig oder gewöhnlich mit unrichtiger Akzentuierung ausgesprochen hört.

Wir lasssen noch zur Hilfe für weniger geübte Leser die größtenteils selbstverständliche Erklärung der abgekürzten Ländernamen in alphabetischrr Reihe folgen.
